Fee Schedule

Fees as low as 0%

Industry leading fees across all our products

Whether you're just getting started on your investing journey or you're a seasoned crypto trader, you'll find a Kraken product that fits your needs at a competitive price point you'll love. Browse the table below to learn more about the fee structure for each of our offerings.

Instant Buy/Sell

Instantly buy, sell or convert [Bitcoin](#) or other cryptocurrencies on Kraken.com or via the Kraken App.*

Kraken Fees

When you buy, sell, or convert cryptocurrencies or fiat on Kraken, fees apply. These include:

Trading Fees: Kraken charges a 1% trading fee on instant and recurring trades and a 1.5% fee on custom orders, which are waived for Kraken+ members on trading volume up to \$10,000 per month (details below).

Payment Fees: Additional fees may apply depending on your chosen payment method, such as using a credit/debit card, Apple Pay/Google Pay ACH transfer, or your Kraken account balance.

For small balance conversions using the "Convert Small Balances" feature, a fixed 3% fee applies to amounts below the minimum order size.

Spread

When using Kraken's Instant Buy/Sell Services, including custom and recurring purchases, the price you see includes a spread, the difference between the market rate and the rate you receive. This spread ensures price certainty at the time of order execution.

Kraken may retain any excess spread from a transaction. Please note that the spread may vary for similar transactions. The size of the spread varies based on factors such as: market volatility, asset type, order size and type, Kraken VIP status, and overall account activity.

Kraken+

Zero Trading Fees: Kraken+ members enjoy zero trading fees on up to \$10,000 USD (or the local currency equivalent) in monthly trading volume for major currencies (USD, GBP, CAD, AUD, EUR, CHF).

This benefit applies only to trades made through the Buy, Sell, or Convert features on the Kraken app or web, and does not include Spot, Futures, API, or OTC trades on Kraken Pro.

Note: While trading fees are waived, spreads and card processing fees still apply.

*Currently the Kraken App is only available in the countries listed in the "Requirements" section of [this article](#).

On-chain Staking

On-chain staking utilizes blockchain Proof-of-Stake protocol to generate rewards through a process typically called "staking".

Benefits of On-chain staking on Kraken:

- Start earning rewards instantly — no waiting or bonding periods
- One of the highest returns in the industry
- Stake your assets in just three clicks from your Kraken balances
- Instant un-staking when using Flexible terms
- There are currently no transaction fees for Rewards staking or unstaking. On-chain staking commissions apply and are deducted from the rewards earned on your staked assets.
- Flexible staking on assets with an on-chain unbonding period and staked assets in

our Rewards program is subject to a 20% commission.

- Bonded staking and flexible staking on assets with no on-chain unbonding period are subject to commissions based on current balances staked per asset.
- For more information, please see [Fees in our On-chain staking support page](#).

*Availability can be [found here](#). If On-chain staking is not showing as an option on your account, you may not be eligible.

Deposit & Withdrawal

Stocks

Kraken offers commission-free trading for 11k+ stocks and ETFs

- Zero commission for trading stocks and ETFs.
- Regulatory agencies may charge fees that are passed to the investor. [Learn more here](#).

*Currently available in the U.S. only

xStocks

- There are no trading fees when purchasing xStocks with USDG or USD on Kraken.
- The standard 1% instant buy/sell trading fee applies when purchasing xStocks using other assets.
- To lock in a price, a spread may be included in the asset price for each transaction.

*Availability can be [found here](#). If xStocks is not showing as an option on your account, you may not be eligible.

Perps

A simple, flexible way to trade on where you think prices are headed on — without needing to own the underlying asset.

- A 0.25% fee is applied to the notional value of the trade to open the position.
- A 0.25% fee is applied to the closed notional value of the trade to close the position.

*Currently available in certain geos

Kraken Pro fee considerations

- Fees are charged on a per-trade basis.
- Fees are calculated as a percentage of the trade's quote currency volume (by default). Certain pairs allow the fee to be calculated based on the trade's base currency, which can be specified when ordering using the Fee Currency option.
- User fee volume levels are measured using the equivalent market value of the listed "Fee Volume Currency" at the time of the trade. Note that this currency may be different from the pair's base or quote currency.
- User fee volume levels are measured and applicable for trades occurring in the last 30 days only.
- Discount tiers are assessed after every trade, so you get your discounts when you earn them.
- Our volume-based discounts are designed to be attainable so investors of all sizes are rewarded for their trades.
- If you're not a frequent trader but you do big volume, consider our OTC service for a more cost-effective, personal experience.

Low fees for both makers and takers

Almost all of our cryptocurrency pairs follow the same fee schedule, which incentivizes market makers to increase liquidity - meaning it's easier for you to execute trades at the price you want.

These materials are for general information purposes only and are not investment or financial product advice or a recommendation or solicitation to buy, sell, stake or hold any cryptoasset or to engage in any specific trading strategy. Kraken does not and will not work to increase or decrease the price of any particular cryptoasset it makes available. The unpredictable nature of the crypto-asset markets can lead to loss of funds. Tax may be payable on any return and/or on any increase in the value of your cryptoassets and you should seek independent advice on your taxation position. Geographic restrictions may apply. Some crypto products and markets are unregulated. Kraken's regulatory status for its various products and services differs per jurisdiction and you may not be protected by government compensation and/or regulatory protection schemes. See [Legal Disclosures](#) for each jurisdiction.
*Not available in the US or to US persons. IPO xStocks involve risk. Allocation not guaranteed. Geo restrictions apply.

Availability of margin trading services is subject to [certain limitations and eligibility criteria](#). Trading using margin involves an element of risk and may not be suitable for everyone. Read [Kraken's Margin Disclosure Statement](#) to learn more.

Geographic restrictions apply. Projected annual rate is an estimate based on the average staking rewards accrued over the past period, before commission, and is subject to change. Staking involves risks including no guarantee of rewards, potential loss from slashing or hacks, and depreciation in the value of assets while staked. Please refer to Kraken's [Terms of Service](#) for additional information.
