Kraken Pro

Kraken has recently introduced Cross-platform fee tiers, read [here](#) for details.

You can also check out our [support article](#) which contains additional information.

Cross-platform Fee Tiers

How your tier is determined

Your tier is based on the **best of**:

- Your **spot trading volume**
- Your **futures trading volume**
- Your **Assets on Platform (AoP)**

Your tier reflects the most favorable of the three measures. So if your futures volume is where you're most active, that now counts toward your spot tier, automatically. If more than one measure qualifies you for the same tier, your rates remain unchanged, qualifying through multiple measures at the same tier does not provide additional benefits.

Spot Crypto

Kraken uses a maker-taker fee tier system with volume incentives based on your spot, margin, and futures volume, as well as your assets on platform (AoP) in the past 30 days.*

Our fee tiers are built to reward traders regardless of which product of the Kraken platform they use, thus driving maximum liquidity.

[More information about cross-platform fee tiers](#)

Certain services, including Telegram chat trading, use request-for-quote pricing. For these trades, the quoted price is all-inclusive and already reflects Kraken's spread and fees.

*Volume generated with Instant Buy does not count towards your 30 day volume incentives.

Spot Maker Rebate

Spot rebates are a new maker fee incentive structure on a select number of lower-liquidity spot pairs.

Designed to **improve market structure** by stimulating passive liquidity, narrowing spreads, and enhancing overall book depth on recently underperforming pairs. Full fee schedule and eligible pair list are available [here](#).

Your spot rebate fee tier is based on the **best of**:

- Your **spot trading volume**
- Your **Futures volume**
- Your **Assets on Platform (AoP)**

The measure that qualifies you for the highest tier applies. Holding assets on Kraken can now qualify you for lower trading fees, the more you hold, the lower your rate could be. If more than one measure qualifies you for the same tier, your rates remain unchanged, qualifying through multiple measures at the same tier does not provide additional benefits.

*Volume generated with Instant Buy does not count towards your 30 day volume incentives.

Stablecoin, Pegged Token & FX Pairs

This fee schedule applies to FX pairs (EUR/USD), stablecoins in the base currency (USDT/USD, DAI/USD, etc.) and pegged tokens (TBTC/BTC, WBTC/BTC, etc.). If the stablecoin is the quote currency only (BTC/DAI), the fee schedule in the "Spot Crypto" tab applies.*

With our competitive stablecoin fee structure, we aim to deliver deep liquidity, tight spreads and minimal slippage.

For more information regarding stablecoin, pegged token & FX pair fees, please see our [Support Center article](#).

30- Day Volume (USD)	Maker	Taker
\$0 +	0.20%	0.20%

\$10,000,000 +	0.00%	0.01%
\$100,000,000 +	0.00%	0.001%

*Fee schedule volume-based discounts are based on crypto trading volume only. Making purchases using the Buy Crypto widget, Kraken app as well as trading stablecoin and FX pairs on our order books does not contribute to the fee schedule 30-day volume.

USDG Pairs

The USDG fee schedule aims to make USDG a compelling and efficient stablecoin within the Kraken ecosystem — promoting deep liquidity, tighter spreads, and minimal trading costs.

This fee schedule applies only to pairs where USDG is the base currency (for example: USDG/USD)

30- Day Volume (USD)	Maker	Taker
\$0 +	0.0%	0.01%
\$100,000,000 + **	0.0%	0.001%

\$0 +	0.0%	0.0%

Margin

Futures

Kraken uses a maker-taker fee tier system with volume incentives based on your spot, margin and Futures volume, as well as your assets on platform (AoP) in the past 30 days.*

[More information about cross-platform fee tiers](#)

Volume on FX pairs and stablecoin order books does not contribute any volume-based discounts on Kraken Futures and vice versa.

**For Canada, US, and New Zealand customers, futures are not available or do not apply to cross-platform tier qualification.*

Kraken Pro fee considerations

- Fees are charged on a per-trade basis.
- Fees are calculated as a percentage of the trade's quote currency volume (by

default). Certain pairs allow the fee to be calculated based on the trade's base currency, which can be specified when ordering using the Fee Currency option.

- User fee volume levels are measured using the equivalent market value of the listed "Fee Volume Currency" at the time of the trade. Note that this currency may be different from the pair's base or quote currency.
- User fee volume levels are measured and applicable for trades occurring in the last 30 days only.
- Discount tiers are assessed after every trade, so you get your discounts when you earn them.
- Our volume-based discounts are designed to be attainable so investors of all sizes are rewarded for their trades.
- If you're not a frequent trader but you do big volume, consider our OTC service for a more cost-effective, personal experience.

Low fees for both makers and takers

Almost all of our cryptocurrency pairs follow the same fee schedule, which incentivizes market makers to increase liquidity - meaning it's easier for you to execute trades at the price you want.
